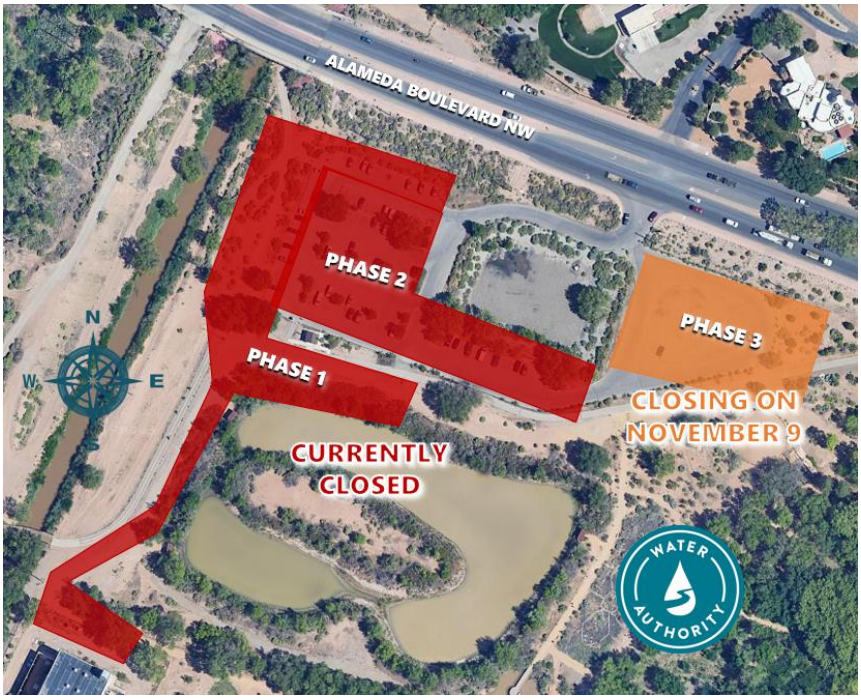
CONSTRUCTION UPDATE

PHASES 1 & 2 ARE NOW SCHEDULED TO REOPEN ON NOVEMBER 9 AT ALAMEDA OPEN SPACE

Due to unexpected project delays, Phases 1 and 2 will now be opened by November 9 instead of on November 2 as expected. Phase 3 is scheduled to be closed on Monday, November 9 for solar-covered parking installation. Thank you for your continued patience



This solar-covered parking project is **scheduled to be completed in December 2026.**

How will this improvement project impact you?

1. Visitors should avoid closed areas during construction. All trail access points will remain open during construction. Use caution near construction zones.

2. Several trees and shrubs will be removed in the parking lot to accommodate the new solar-covered parking. The CABQ Open Space and Parks & Recreation will replace any removed vegetation at a higher ratio than was removed.

3. Alternative parking is available at the Shining River Parking Area located at 8545 Rio Grande NW.
